Today's topic is all about DevOps, Integration and API. Digitalization?

API's here and there long time. Why API management is so important NOW?

PSD2 is effective on 13.1.2018

Changing consumer demand is big challenge for 89% of Nordic banks. 47% of transaction business (1,1 Be) is under competition by new 3rd party providers. "Start shaping The Future of Banking" - Accenture

Four driving factors are rapidly impacting the banking industry

1. Similar to any consumer-oriented industry, banks are facing new customer demands fueled by digital – customer expectations for convenience of banking services are driven by digitalization in other industries

2. The ongoing industry convergence is opening doors to new competition, new ways of doing business and new revenue opportunities

3. Fueled by intensified technology innovation, customer expectations and empowerment are rising rapidly which enables new players to enter the value chain

4. Digital disruptors address customer needs in completely new ways and are growing strongly throughout the Nordics
